G. M. ROBERTS
TRANSPORTATION DIRECTOR

June 26, 2000

Mr. Nigel Osborne
President
Case Atlantic CO.
Clearwater, Florida

Dear Mr. Osborne:

RE: Project No. BRF-117(4)
US 31 Bridge Montgomery, Al.
Drilled Shaft Construction

I am writing this letter to commend Mr. Terry Miller's performance on the above referenced project. I have received many compliments on how well the 12ft. diameter drilled shaft construction went across the river. This being the first drilled shaft experience for myself, I do not feel deserving of these compliments. The drilled shaft construction would not have been as successful without the experience of Mr. Miller.

Terry's professionalism and vast experience in drilled shaft construction was a tremendous help to me. Terry always took the time to outline what he was going to do. Terry always explained why he was doing something, and what the final result would be. I am very grateful for Terry's help in making this project move as smoothly as possible.

I hope this letter reflects my gratitude for Terry's help on this project. I feel my experience gained from this project would have been much less without Terry's involvement. I hope to have the opportunity to work with Case Atlantic and Terry Miller again in the future.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Harper".

Mike Harper
Project Engineer
